Hi Hays, Rich and I drafted this statement of work during our long drive back to SLC. Rich will be out of his office today and tomorrow, and therefore asked me to fax this statement of work as sort of a start for you to use in drafting up a memo to him. Rich needs a memo similar to the attached from you to help expedite his end of contracts negotiation and justifying using Max and Jacobs. If you would like an electronic copy of this draft, please email me your email address. My email address is Michael.Sajadi@jacobs.com

I Sure hope this helps. Please call me to very briefly discuss

Regards,

Mike

Subject: Continuing Remediation at Naples Truck Stop

Pursuant to our meeting in Vernal Utah on August 11, 1998, I request that you procure the services of Jacobs Engineering to perform 3 months of operation and maintenance and 4 monthly sampling events, similar to the services performed since January 1995.

I also request that you secure the services of Jacobs Engineering and a local Vernal firm (Round Top Inc.) to plant approximately 500 trees adjacent to the sit for purposes of ongoing site remediation. This tasking should include planting and maintaining the appropriate trees for applying phytoremediation technology. Tree maintenance and quarterly groundwater monitoring should be provided for a minimum of 2 years.

The tree planting should be completed by November 1, 1998 to allow time for the trees to be established prior to winter.
